
EXPERIENCE SUMMARY

- Highly creative and talented Web Designer with over 14 years dedicated to Graphical User Interface (GUI) design
- Crafted over 50 web designs enhanced with the latest DHTML, including Cascading Style Sheets and JavaScript
- Incorporated advanced coding techniques into HTML, such as: DHTML, XHTML, SHTML, PHP, Java, ASP & CGI
- Designed & tested over 100 web projects for healthcare, automotive, insurance, financial and government sectors
- Researched ADA Compliance Standards for Accessible Design & constructed many disability accessible websites
- Successfully juggled several projects simultaneously for weeks at a time with client satisfaction as the end result

SKILLS SUMMARY

Advanced Coding Techniques

- XHTML with Cascading Style Sheets (CSS) for dynamic website maintenance & JavaScript for aesthetic effects
- Advanced HTML & CSS, ADA Compliance tested with JAWS for Windows, Bobby WorldWide & W3C Validators
- ASP pages with server-side includes for advanced functionality, multi-user flexibility and easy site maintenance
- Java applets for site's visual enhancement and navigational purposes by incorporating sliding image links

Web Design Software Skills

- Adobe Fireworks to design storyboards, comps and image slices that enhance site user interfaces
- Adobe Dreamweaver & Microsoft FrontPage to develop and code designs with HTML & server-side functionality
- TopStyle and AllWebMenus for text enhancement and development of dynamic menu navigations
- Adobe Flash for design of website interactivity and eye catching animations optimized for web viewing
- Adobe Acrobat for conversion and web optimization of detailed technical drawings and text documents

Traditional Graphics Skills

- Adobe Illustrator for design of logos, corporate branding, illustrations and iconographic website menus
- Adobe Photoshop for photo editing, special effects/masking and website image optimization
- Adobe PageMaker for the design and printing of business cards, postcards and newsletters

Office Software Skills

- Microsoft Office for project bids and the development of the Covansys ADA Compliance standards Manual
- Microsoft Visio for site development and visual presentation of site architecture / web page flow
- Microsoft PowerPoint for creation of professional looking executive PowerPoint presentations

PROJECT EXPERIENCE

Web Designer (Freelance) • File Design Systems • Tecumseh, ON (11/2009 ~ Present)

Designed creative banners, logos and other graphics for the following websites using Adobe Illustrator, Fireworks, Photoshop and Flash HTML/CSS & PHP programming was incorporated for dynamic maintenance. Some of these sites include a valuable announcement feature that the client can edit at will via a web browser interface.

- Fuerland Realty • www.fuerlandrealty.com
- Lakefront Marine Inc. • www.lakefrontmarine.ca
- ScooterPro • www.scooterpro.ca
- Stereoland • www.stereoland.ca

Web Designer (Freelance) • Oliver & Associates Marketing • Essex, ON (2003 ~ Present)

Designed and developed functional and aesthetically pleasing websites and/or Flash animations for many small businesses. After developing screen caps, I sliced the designs, coded them, uploaded them to the servers and tested them on multiple browsers and platforms. Most of these projects included optimizing photos, creating illustrations and/or company logos. The latest sites include the most recent Search Engine Optimization (SEO) techniques. The Pilates Fitness Evolution incorporates a PHP forum and The Doula Collective features a PHP login. For more information on the design/development of individual projects, please view my portfolio at www.savie.biz.

In addition, the E-Learning Courses incorporated complex Cascading Style Sheets that were used in the HTML pages. I also designed creative illustrations that were imported into Flash for usage in the scene keyframes.

- Ontario Ministry of Education • E-Learning Courses 2008 - 2010
- Sunrise Side Bulk Packs • www.sunrisesidebulkpacks.com
- FFI Nutritionals • www.ffinutritionals.com

- Cybertrainer.ca • www.cybertrainer.ca

Web Designer • Covansys • Farmington Hills, MI (1999 ~ 2003)

Designed and developed Internet and Intranet sites for many large corporations, health care providers and the government sector. After developing screen caps, I sliced the designs, coded them, uploaded them to the servers and tested them on multiple browsers and platforms. These projects included working closely with programmers to insure a functional, top-quality and professional looking site. More information about the design & development of individual projects, along with their screencaps, can be viewed on my portfolio website at www.savie.biz.

- Henry Ford Health System • Business Intelligence (PANS), HRMS PeopleSoft & Sleep Center Site
